

Be Part of the Future of Health Care

UC SAN DIEGO HEALTH – HILLCREST MEDICAL CAMPUS OUTPATIENT PAVILLION

BEST IN SAN DIEGO

U.S. News & World Report ranked UC San Diego Health #1 in San Diego and #5 in California (2021–22), with 10 medical and surgical specialties rated among the nation's best.

FIRST OF FIVE PHASES

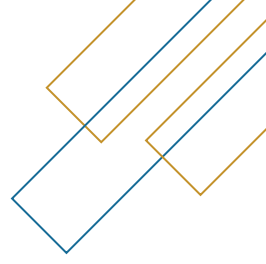

This is just the beginning — construction started in November 2021 and is planned to continue over the next 15 years, including a new state-of-the-art hospital bed tower, residential living, wellness center and green spaces.

COLLABORATIVE, ACCESSIBLE AND COMPREHENSIVE

The new Outpatient Pavilion is designed to transform patient experience through the multidisciplinary collaboration of our physicians, the ease of use of the upgraded and integrated space, and the comprehensive specialty medical services.

UC San Diego Health has been our region's only academic medical center serving our community for more than half a century. Our Hillcrest medical campus has long been a beacon of hope and healing as we have innovated new therapies, trained thousands of new physician-scientists, and provided health care for San Diego.

With a bold vision and modernized infrastructure, the new Outpatient Pavilion at UC San Diego Health – Hillcrest Medical Campus will care for an ever-growing population, utilize the latest technology, and train health care providers at a thoughtfully planned campus. UC San Diego Health in Hillcrest is a critically important resource for bridging health care disparities in underserved communities, and this new pavilion will continue our commitment to providing outstanding care to all of San Diego.

More than a Building: A Place of Hope and Healing

The new Outpatient Pavilion will add almost 250,000 square feet across six levels and house specialized clinics, outpatient surgery operating rooms, and comprehensive cancer services to provide excellent precision medical care to our community. We will also increase accessibility through the addition of a parking garage and improved traffic flow. Together, we can build a medical center that will continue to be the model for the future of world-class medical care.

UC San Diego Health – Hillcrest Medical Campus's new Outpatient Pavilion will be the future of health care, and we need your support to bring it to life.

The inclusion of these new clinics will address the needs of our growing San Diego community:

- Advanced Imaging
- Burn and Trauma
- Cancer Services, including the Infusion Center and Breast Center
- Colorectal Surgery
- Gastroenterology
- Minimally Invasive Surgery
- Neurology
- Neurosurgery
- Orthopaedic Surgery
- Otolaryngology and Audiology
- Perinatology
- Radiation Oncology
- Surgery Center
- Urology
- Vascular Surgery

Cancer Resource Center for patients and families (concept rendering above).

Our goal is to create a health care ecosystem which supports multidisciplinary collaboration between physician-scientists to address the individual needs of each patient. Because the Outpatient Pavilion will house many specialized clinics in one building, not only will physicians have direct access to their peers, but patients and their families will have an easier experience navigating their health care needs since their providers, treatments and services will be all in one place.

For example, a person who is diagnosed with prostate cancer can receive care from their physician, innovative brachytherapy, radiation therapy and outpatient surgery all in the same building. And because their care is centralized and integrated, they have the benefit of the top clinical minds working together to provide the best possible treatment options.

Similarly, the burn and trauma clinics will be co-located with the plastic surgery clinic, and adjacent to orthopedic trauma, in order to address our patients' complex needs.

By leveraging a collaborative bench-to-bedside system, we will improve patient care, accelerate innovations in treatment, and deliver unmatched training for the next generation of physicians and providers.

UC San Diego Health is the one place that can integrate research, teaching and clinical care across its health care offerings. The new Hillcrest Outpatient Pavilion will be a central component of a top-rated academic health campus and an invaluable resource for all San Diegans.

The new central registration area will welcome patients and families with an easy to navigate check-in process.

Together, we are changing the future course of health care at UC San Diego Health in Hillcrest.
